1 INTRODUCTION

MSB Plastics Manufacturing Limited Plant 2 (MSB2) is a manufacturer of plastic automotive parts for OEMs. The production of interior auto parts involves painting, in which certain toxic substances are used as formulation component for quality control in the process.

MSB2 has developed a toxic substance reduction plan for Isopropyl alcohol in the previous year in accordance with Toxic Reduction Plan Act and Ontario Regulation 455/09; Since no potential reduction option could be identified that was both technically and economically feasible to reduce the use of Isopropyl alcohol, no reduction option was determined to be implemented for this substance during the reporting year. However, the facility commits to investigate any new technologies for their feasibility of improving the part cleaning process and even reducing the use/release of this substance.

MSB2 manages the toxic reduction plan as part of the ISO 14001 based Environmental Management System. We understand toxic reduction will be an ongoing effort and will continually team up with our suppliers to eliminate or reduce the use/release of the toxic substances from the paint line, wherever feasible.

This annual toxics substance accounting report has been prepared to meet the regulatory obligations specified in Section 10 of the Act and has been prepared in accordance with the requirements of Section 27(1) of Ontario Regulation 455/09.

2 QUANTIFICATION OF THE SUBSTANCES

For the purpose of maintaining confidentiality, MSB2 has reported 'Use', 'Released' and 'Transferred Offsite for Recycling' quantities in the bands and ranges prescribed by the Ontario Ministry of the Environment and Climate Change as follows:

- >0 to 1
- >1 to 10
- >10 to 100
- >100 to 1,000
- >1,000 to 10,000
- >10,000 to 100, 000
- >100,000 to 1,000,000

There were process changes in the last year. The facility experienced transitional changes from water based operations to combined water and solvent based operations. There were no changes in methods or combination of methods used to track and quantify the toxic substances listed above. There were no changes to the toxic reduction plan.
